

We are proud to announce that the Foundation has become a donor to two organizations that are close to our hearts: MEDForêt and the FondaMental Foundation.

This commitment reflects our desire to support projects with tangible impact, focusing on environmental preservation and the promotion of mental health — causes that strongly align with our values and on-the-ground actions.

**By becoming donors, we aim to support these organizations in their missions while raising awareness among our audiences about these essential issues.**

# 3 months to act

The last quarter of 2025 was particularly rich in exchanges with our partners, donors and prospects.

These meetings provided an opportunity to present our ambitions for 2026 and to confirm the growing interest in our three main focus areas: mental health in high-level sport, environmental impact in motorsport, and raising awareness of careers in the sector.

These discussions strengthened our network, opened up new support opportunities, and laid the foundations for solid collaborations in the year ahead.

## Key Figure

## Focus on motorsport education programs

We met with Thierry Blasquez, Head of the CAFOC department, to move forward on the development of our "education" pillar dedicated to careers in motorsport.

In a context marked by a current skills shortage and the lack of formal education programs for certain key roles — such as Team Manager — this discussion laid the foundations for a joint effort to structure new education pathways tailored to the needs of the sector.

## Our first roundtable event

On October 2nd, we organized our first roundtable event on "Resilience: when the body gives up, the mind takes over" at the Domaine de Rieucoulon in Montpellier.

The evening brought together renowned speakers: Arthur Vincent – MHR player and French national team member, Olivier Panis – former Formula 1 driver, Thibaut Nilles – mental coach for Stade Français, and Xavier Combet, co-owner of TDS Racing, providing a rich and inspiring cross-disciplinary perspective on the theme.

The event followed several stages: a warm welcome for guests, presentations from our speakers, followed by an interactive Q&A session. The evening concluded with a cocktail dinner accompanied by live music, encouraging networking and exchanges between participants.

The audience, notably diverse, was one of the highlights of the event: students, business leaders, senior executives, institutional actors, and regional representatives were all present, enhancing the openness and impact of the discussions.

The feedback we received was extremely positive, confirming the growing interest in our initiatives.

Building on this momentum, we are already preparing our next roundtable, scheduled for March 2026.
